

## ***Just pick up and go - with portable power.***

Even the shortest boat rides can turn into big adventures with the F2.5, so get out and enjoy the ride.

Inside a perfectly portable shell, this 4-stroke outboard is packed full of pioneering Yamaha technology. Superb handling, manoeuvrability and reliability come as standard. With a large, comfortable carry-handle, it is also incredibly portable and convenient. And with enough punch to get you where you want to go, an F2.5-powered ride turns any excursion on the water into great fun.

With user-friendly controls, and a vibration-free performance the F2.5 adds a new dimension to small boat adventures and is an ideal auxiliary for discerning yacht owners.

- TCI Ignition System for ultimate reliability
- Strong tiller handle with twist-grip throttle
- Easy-to-use side shift selector
- F-N (Forward – Neutral) gears for easy control
- Steering friction adjustment for manoeuvrability
- Strong, light handles for comfortable portability
- Two step blow-by gas burning system
- Thermostatic water-cooled engine

## ***Technology the World Trusts***

Whether you're a recreational boat owner or a busy professional, choose the engine that will make your boat perform better.

Every engine in the Yamaha range uses the latest Yamaha marine technologies, engine layouts and ingenious intake and exhaust systems. Yamaha's 4-stroke development has been so successful because we build only pure marine-specification 4-stroke engines from scratch - rather than adapting ordinary automotive engines.

Plus Yamaha's specially designed marine engines don't compromise on power, performance or usability, yet still help preserve our marine environments through the use of pioneering clean-burn technologies.

### 360° steering

Take the F2.5 on to the water and you'll soon appreciate how wonderfully agile it is. Full 360° steering offers exceptional manoeuvrability, and makes it much easier to get into tight spots. It also means full reverse thrust is always available without ever having to shift gears.

### Built-in fuel tank

To really get out there, you need to know you've got room for all the necessary gear, whether it's an extra box of bait for the fish, or an extra cooler of refreshments for you. To give you more space inside your boat, the F2.5 has a built in fuel tank, eliminating the need for an external tank.

### Shallow Water Drive system

You can cruise towards the shore with confidence thanks to Yamaha's Shallow Water Drive system. This offers protection for your propeller, whether you're in a murky lake or crystal clear shallows of the sea, so you can get as close as you need to be.

### 'Start-in-gear' protection

With this kind of power, a false start can give you a serious jolt. But Yamaha's 'Start-in-gear' protection eradicates such worries. To prevent damage to the engine, the starter is locked when in gears other than neutral.

### Steering friction adjustment

You'll find the F2.5 incredibly easy to control, thanks to the single-lever steering friction and throttle adjustment. This allows steering and throttle to be easily adjusted when you're out on the water, and ensures that you have great stability and control, even at high speed.

### TCI Ignition System

You want the fun to start as soon as you get on to the water, and the engine to purr with the minimum of fuss. Yamaha ignition systems are 'solid state' components with no moving parts – a design which allows them to deliver the reliable starting and consistent performance for which Yamaha outboards are renowned across the globe.

ENGINE	
Type	4-Stroke
Displacement (cm <sup>3</sup> )	72
No. of cylinders/Configuration	1
Bore x Stroke (mm)	54 x 31.5
Prop shaft output at mid range (kW/ rpm)	1.8 / 5500
Full throttle range (rpm)	5250 - 5750
Lubrication system	Splash
Carburettors	1
Electronic Fuel Injection	-
Ignition/advance system	TCI
Starter system	Manual
Gear ratio	13 : 27
DIMENSIONS	
Recommended boat transom height (mm)	S: 381 L: 508
Weight with propeller (kg)	-
Weight without propeller (kg)	F2.5AMHS: 17.0 F2.5AMHL: 17.5
Fuel tank capacity (litres)	0.9
Oil pan capacity (litres)	0.4
ADDITIONAL FEATURES	
Steering	Tiller handle

Throttle and shift controls	Twist grip F-N/side shift
Trim & Tilt method (Trim angle)	Manual (0°, 4°, 8°, 12°)
Lighting coil/alternator	-
Number of Propeller options	5
Size Range (ins)	5 - 8¼

The kW data in this sheet is based on the ICOMIA 28 standard, measured at the prop shaft.

## Yamaha Marine Parts and Accessories

Yamaha genuine parts and accessories are designed to work seamlessly together which not only means co-ordinated looks and styling, but better performance and total peace of mind.

There's a wide range too, from watersport accessories, high-tech Yamalube® marine lubricants, apparel, safety gear and more. Ask your dealer about the Digital Network Gauges and electronic control systems for a revolution in boating confidence, enjoyment and safety. Whatever you need to enhance your fun and enjoyment on the water, we've got it covered with products that are designed to perform and built to last.
